CUMULATIVE SUBJECT INDEX

VOLUME 19

** indicates original article*

ACETYLCARBROMAL
—drug habituation to, side effects and mortality rates, 149

ACTIVITY THERAPY
—milieu and activity therapy with chronically disturbed female patients, 347

ADJUSTMENT
—organic and organizational aspects of school adjustment problems, 247

ADOLESCENTS
—method for differential diagnosis of brain damage in, 152

ADRENAL GLANDS
—adrenocortical response in schizophrenia, 150
—blood levels of adrenal cortex and thyroid hormones in patients with depressive reactions, 155

ADRENALIN
—personality reaction to, 202*

AGE
—electroencephalographic alpha rate in adults and, 263

AGED—*See Old Age.*

AGITATION
—chlorpromazine as adjunctive therapy in senile agitation, 134*
—perphenazine (Trilafon) to control anxiety and agitation in aged patients, 242

ALCOHOLISM
—alcohol, alcoholism, and conditioning, 336
—auditory hallucinations in chronic alcoholism, 335
—delirium tremens, reduction of mortality and morbidity with promazine, 238
—follow-up of alcoholics committed to a state hospital, 60
—methylphenidate (Ritalin) hydrochloride in alcoholism, 239
—rauwiloid therapy in, 74

ALPHA,ALPHA,BETA,BETA-TETRAMETHYL SUCCINIMIDE (PM 1090)
—clinical investigation of a convulsant drug, 38*

AMEBIASIS
—chlorbetamide in treatment of, 44*

AMOBARBITAL
—intoxication effects of premedication with, and psychopharmacological effects of lysergic acid diethylamide, 157

ANNOUNCEMENTS
—American Psychosomatic Society meeting, 270
—American Society of Clinical Hypnosis elects, 144
—Association for Retarded Children to meet, 144
—Dr. Martí-Ibáñez honored by awards, 43
—Fifteenth annual meeting of American Psychosomatic Society, 37
—First Annual Neuro-Psychiatric Institute held, 218
—Fourth International Congress of Psychotherapy meeting, 101
—Institute on Chronic Schizophrenia meeting, 201
—International Conference on Insulin Treatment arranged, 225
—mental health research grants of National Institute of Mental Health, 145
—training laboratory in group development to be held, 144
—University of Vienna Institute for Psychotherapy established, 140

ANOXIA
—clinical aspect of cerebral, 75

ANTIBIOTICS
—influence of, on aged mental patients, 243

ANXIETY
—dimethylane in treatment of anxiety reactions, 157
—perphenazine (Trilafon) to control anxiety and agitation in aged patients, 242
—psychoanalytic approach to schizophrenic anxiety, 346
—*Rauwolfia serpentina* in control of, 252
—relation of student anxiety to concepts of role in medical care, 344
—reserpine in anxiety states, 71
—treatment of, with proclorperazine in geriatric patients, 156

APHASIA
—rehabilitation of aphasic patients, 169

ARECOLINE
—inhibition of conditioned response following arecoline administration, 226*

AROUSAL RESPONSE
—effect of drugs on arousal responses produced by electrical stimulation of the recticular formation of brain, 257

ATARAXICS
See also under specific drug.
—current status of tranquilizing drugs, 251
—neurological symptoms of parkinsonism in patients under treatment with, 156
—tranquilizers and patient's environment, 250
—two-year comparative study of, in neuropsychiatric patients, 69

ATROPINE
—atropine coma therapy, 312*

—intoxication effects of premedication with, and psychopharmacological effects of lysergic acid diethylamide, 157

AZACYCLONOL
—clinical evaluation of, on chronic psychotic population, 69
—treatment of neuropsychiatric patients with, 69

BACK
—compensation factor in low back injuries, 340

BEHAVIOR
—relation of electroencephalographic delta activity to behavioral response in electroshock, 158

BENACTYZINE HYDROCHLORIDE
—chemotherapy of depression, use of meprobamate combined with benactyzine (2-diethylaminoethyl benzilate) hydrochloride, 351

BLEULER
—concepts of Bleuler, approach to phenomenologic analyses, 242

BLINDNESS
—cerebral blindness, with reference to electroencephalogram and patterns of recovery, 165

BLOOD
—blood levels of adrenal cortex and thyroid hormones in patients suffering from depressive reactions, 155
—glutamic oxalacetic transaminase in serum and cerebrospinal fluid of patients with cerebrovascular accidents, demonstration of blood-cerebrospinal-fluid barrier, 163
—neurologic manifestations of thrombotic thrombocytopenic purpura, 256

BLOOD VESSELS
—hypothermia and cerebral vascular lesions, experimental middle cerebral artery interruption followed by induction of hypothermia, 162

BOOK REVIEWS
—Analyzing Psychotherapy, 268
—Basic Psychology: A Study of the Modern Healthy Mind, 171
—Changing Patient-Doctor Relationship, The, 85
—Closed ranks—an Experiment in Mental Health Education, 177
—Comparative Psychology of Mental Development, 87
—Congenital Anomalies of the Viscera (Their Embryological Basis), 175
—Death of a Man, 90
—Discussions on Child Development: First and Second Meetings of the World Health Study Group on the Psychobiological Development of the Child, 88
—Doctor, His Patient and the Illness, The, 82
—Education and Human Motivation, 365
—Envy and Gratitude: A Study of Unconscious Sources, 179
—Epilepsy, 174
—Erogeneity and Libido, vol. I, 366
—Experimental Psychology and Other Essays, 174
—Freud and Contemporary Culture, 89
—Guilty and the Innocent, The, 365
—Handicapped and Their Rehabilitation, The, 173
—Headache, 86
—Hospital Treatment of Alcoholism, 86
—Insight, A Study of Human Understanding, 178
—Instinct in Man, 269
—Life of Man with God, The, 83
—Life and Work of Sigmund Freud, the Last Phase, 1919–1939, The, vol. 3, 172
—Magic, Myth and Medicine, 368
—Mammalian Cerebral Cortex, The, 367
—Mind of the Murderer, The, 368
—No and Yes: On the Genesis of Human Communication, 175
—Practical Psychiatry for Industrial Physicians, 170
—Psychiatric Education and Progress, 83
—Psychiatry and the Criminal, 173
—Psychoanalytic Study of the Child, The, vol. 12, 268
—Psychological Research, 85
—Recovery from Schizophrenia, 175
—Riddle of Stuttering, The, 177
—Sanctity of Life and the Criminal Law, The, 84
—Schedules of Reinforcement, 176
—Studies on Hysteria, 84
—Theories of Personality, 366
—Therapeutic Exercises for the Treatment of the Neurological Disabled: A Text for Corrective Therapist and Physical Educators, 174

BRAIN
—care of severely injured patient, neurosurgical injuries, 165
—Effect of drugs on electrical activity of, 79
—5-hydroxytryptamine (serotonin) content in human brain, 357
—process of demyelination in the central nervous system, mechanism of demyelination and necrosis of the cerebral centrum incident to x-radiation, 267
—reactivity of brain tissue to intracranial and external electrotherapy, 162
—weights of brain, heart, spleen, and kidneys in elderly, mentally ill patients, relation of organ weights to sex, age, nutrition, and cause of death, 342

damage:
—clinical aspect of cerebral anoxia, 75
—glutamic oxalacetic transaminase in serum and cerebrospinal fluid of patients with cerebrovascular accidents, demonstration of blood-cerebrospinal-fluid barrier, 163

—method for differential diagnosis of, 152
diseases:
—bilateral loss of vision from cerebral infection, 264
—diagnosis of cerebral schistosomiasis, 263
—generalized moniliasis with localization in brain, 363
—multilocular cystic encephalopathy of infants, 364
—sequelae of western equine and other arthropod-borne encephalitides, 167
—tuberculous meningitis, 166
drugs and:
—effect of drugs on arousal responses produced by electrical stimulation of recticular formation o. brain, 257
—influence of antibiotics on aged mental patients, 243
hemorrhage:
—subarachnoid hemorrhage with papilledema due to spinal neurofibroma, 261
—subdural hematoma, subdural hygroma, and subarachnoid hemorrhage among infants and children, 167
lesions:
—cerebral blindness, with reference to electroencephalogram and patterns of recovery, 165
—hypothermia and cerebral vascular lesions, experimental middle cerebral artery interruption followed by induction of hypothermia, 162
—recent memory impairment in unilateral temporal lesions, 160
—unrecognized intracranial lesions in mentally sick patients over 60, 81
tumors:
—brainstem, in children, 265
—hydatid cyst of brain, and its treatment, 165
—primary intracranial neoplasms, prognosis and classification of 513 verified cases, 80
—significance of the EEG for diagnosis and localization of cerebral tumors, 262

BROMISOVALUM
—drug habituation to, side effects and mortality rates, 149

2-BROMO-*d*-LYSERGIC ACID DIETHYLAMIDE (BOL-148)
—intoxication effects of premedication with, and psychopharmacological effects of lysergic acid diethylamide, 157

CALIFORNIA
—treatment of sex offenders in, 339

CARBON DIOXIDE
—new procedure for administration of, 309*
—therapy with, physiologic principles and clinical implications, 91*

CARBON MONOXIDE
—electroencephalographic findings in acute poisoning with, 361

CATATONIA
—adrenocortical response and phosphate excretion in, 150
—experimental catatonia and psychopharmacology of neuroleptics, 277*

CELOTIN—*See N-Methyl-α,α-methylphenylsuccinimide.*

CENTRAL NERVOUS SYSTEM
—process of demyelination in central nervous system, mechanism of demyelination and necrosis of the cerebral centrum incident to x-radiation, 267

CEREBROSPINAL FLUID
—clinical significance of low cerebral spinal fluid pressure, 257
—glutamic oxalacetic transaminase in serum and cerebrospinal fluid of patients with cerebrovascular accidents, demonstration of blood-cerebrospinal-fluid barrier, 163

CERULOPLASMIN
—studies with ceruloplasmin and a new hallucinogen, 350

CERVICAL SPONDYLOSIS
—association of, and disseminated sclerosis, 260

CHILDBIRTH
—response of postpartum psychiatric symptoms to L-triiodothyronine, 170

CHILDREN
—brainstem tumors in, 265
—culture of interpersonal relations in therapeutic institution for emotionally disturbed, 154
—differentiations between mental defective with psychosis and childhood schizophrenic functioning as mental defective, 153
—method for differential diagnosis of brain damage in adolescents, 152
—organic and organizational aspects of school adjustment problems, 247
—pediatric contributions to neurology, 160
—subdural hematoma, subdural hygroma, and subarachnoid hemorrhage in, 167

CHLORBETAMIDE
—research and treatment with, 44*

CHLORPROMAZINE
—chlorpromazine jaundice, effect of continued chlorpromazine ingestion in the presence of chlorpromazine jaundice, 352
—combined chlorpromazine-mepazine therapy, 32*
—convulsant action of phenothiazine derivatives, 168
—intoxication effects of premedication with, and psychopharmacological effects of lysergic acid diethylamide, 157
—use to activate electroencephalographic seizure patterns, 262
evaluation of:
—appraisal of, based on experience with 1090 patients, 70

—comparative study on Thorazine and Serpasil in mental defectives, 73
therapeutic use:
—as adjunctive therapy in senile agitation, 134*
—comparative study of chlorpromazine and insulin coma in therapy of psychosis, 348
—sustained-release chlorpromazine in management of hospitalized chronic psychotic patients, 348
—in treatment of chronic schizophrenia, 251
—treatment of neuropsychiatric patients with, 69
—for trichotillomania of long standing, 141*

COLLAGEN DISEASE
—of the nervous system, with particular reference to the syndrome of infectious polyneuritis, 264

COMA
—atropine coma therapy, 312*
—protracted coma in insulin shock therapy, 102*

COMMUNITY
—basic concepts for restoration of psychiatric patient to employment and, 64

CONDITIONED REFLEXES
—drug placebo, its psychodynamic and conditional reflex action, 61
—inhibition of, following arecoline administration, 226*

CONSCIOUSNESS
—loss of consciousness and convulsions with congenital heart disease, 356
—termination of central pain pathway in man, conscious appreciation of pain, 266

CONVERSION
—hysteria, the hysterical personality, and "hysterical" conversion, 249

CONVULSIONS
—loss of consciousness and convulsions with congenital heart disease, 356

CONVULSIVE DISORDERS
—"psychomotor" or "temporal lobe" epilepsy, 76
—subclinical epileptic seizures, impairment of motor performance and derivative difficulties, 76

CRANIOCEREBRAL INJURIES
—care of severely injured patient, neurosurgical injuries, 165

CREATIVITY
—personality and creativity in artists and writers, 341

DEAFNESS
—theory of nerve deafness, 357

DEGENERATIVE DISEASES OF NERVOUS SYSTEM
—association of cervical spondylosis and disseminated sclerosis, 260
—demyelinating diseases, 77
—effects of procaine amide in Huntington's chorea, 359
—familial occurrence of multiple sclerosis, 260
—prognosis and treatment of multiple sclerosis, 359
—psychiatric aspects of multiple sclerosis, 259
—psychic alterations in disseminated sclerosis, 77
—teamwork and Parkinson's disease, 261
—tuberous sclerosis complex, 358

DELIRIUM TREMENS
—reduction of mortality and morbidity with promazine, 238

DEMENTIA
—differential diagnosis of organic dementias and affective disorders in aged patients, 151

DEMENTIA PRAECOX
—schizophrenia and, 240

DEMYELINATION
—process of demyelination in central nervous system, mechanism of demyelination and necrosis of the cerebral centrum incident to x-radiation, 267

DEPRESSION
—blood levels of adrenal cortex and thyroid hormones of patients suffering from depressive reactions, 155
—chemotherapy of depression, use of meprobamate combined with benactyzine (2-diethylaminoethyl benzilate) hydrochloride, 351
—drug-induced depression, fact or fallacy, 245

11-DESMETHOXYRESERPINE (RAUNORMIN)
—design and conduct of a trial of Raunormine versus reserpine and phenobarbital in chronic schizophrenia, 349

DIABETES
—occurrence of neurologic abnormalities in infants and diabetic mothers, 354

10-(3-DIETHYLAMINOPROPYL) PHENOTHAZINE
—convulsant action of phenothiazine derivatives, 168

DIGITAL CAROTID ARTERY COMPRESSION
—responses to, in hemiplegic or hemiparetic patients, 159

DIMETHYLANE (2,2-DIISOPROPYL-4-HYDROXYMETHYL-1,3-DIOXOLANE)
—in treatment of anxiety reactions, 157

DISSEMINATED SCLEROSIS
—association of cervical spondylosis and, 260
—psychic alterations in, 77

DIZZINESS
—differential diagnosis of, 158

DREAMS
—Freudian dream interpretation 2000 years before Freud, 155

—hypotheses on biological roots of dreams, 128*

DRUGS—*See also under specific drug.*
—comparison of monoureide and diureide sedatives with respect to drug habituation, untoward effects, and mortality rates, 149
—drug-induced depression, 245
—drug placebo, its psychodynamic and conditional reflex action, 61
—effect of, on arousal responses produced by electrical stimulation of recticular formation of brain, 257
—effect of, on electrical activity of brain, 79

ECC SYNDROME
—prevention of, by thyroxin, 97*

EDEMA
—nature of edema in paralyzed limbs of hemiplegic patients, 256

ELECTROENCEPHALOGRAPHY
—alpha rate in adults as function of age, 263
—chlorpromazine, use to activate electroencephalographic seizure patterns, 262
—clinical use of, 78
—correlation of laughing fits, 360
—effect of drugs on arousal responses produced by electrical stimulation of the recticular formation of brain, 257
—effect of drugs on electrical activity of brain, 79
—findings in acute carbon monoxide poisoning, 361
—longitudinal study of, frequency patterns in mental hospital patients and normal controls, 78
—and mental activity, 164
—reactivity of brain tissue to intracranial and external electrotherapy, 162
—relation of delta activity to behavioral response in electroshock, quantitative serial studies, 158
—significance of the EEG for diagnosis and localization of cerebral tumors, 262
—and ventriculography compared for investigation of intracranial tumors, 361

ELECTROSHOCK
—combined electroconvulsive-electrostimulatory therapy, 118*
—relation of delta activity to behavioral response in electroshock, quantitative serial studies, 158

EMPATHY
—sympathy and, 341

EMPLOYMENT
—basic concepts for restoration of psychiatric patient to community and, 64

ENCEPHALITIDES
—sequelae of western equine and other arthropod-borne encephalitides, 167

ENCEPHALOPATHY
—multilocular cystic, of infants, 364

ENDAMOEBA HISTOLYTICA
—infections with, in patients on psychiatric research ward, 44*

ENDOCRINE GLANDS—*See also under specific gland, e.g., Adrenal Glands.*
—endocrine concomitants of physical psychiatric treatments, 71

ENVIRONMENT
—intrafamilial environment of schizophrenic patient, transmission of irrationality, 347
—tranquilizers and patient's environment, 250

ENZYMES
—glutamic oxalacetic transaminase in serum and cerebrospinal fluid of patients with cerebrovascular accidents, demonstration of blood-cerebrospinal-fluid barrier, 163

EPILEPSY
—Celotin in patients with refractory epilepsy, 259
—convulsant action of phenothiazine derivatives, 168
—experimental catatonia and psychopharmacology of neuroleptics, 277*
—management of, 258
—"psychomotor" or "temporal lobe" epilepsy, 76
—recent advances in interpretation and management of, 358
—seizures and syncope, 259
—subclinical epileptic seizures, impairment of motor performance and derivative difficulties, 76
—use of resperpine (Serpasil) in mentally ill epileptics, 68

ETHCHLORVYNOL
—for neuropsychiatric patients, 69

N-ETHYL-3-PIPERIDYL BENZILATE
—studies with ceruloplasmin and a new hallucinogen, 350

ETIOLOGY
—classification of mental deficiency on an etiological-pathological basis, 62
—etiologies of the schizophrenic syndrome, 248

EXCRETION
—phosphate, in schizophrenia, 150

EYES
—pupil dilation in normal and schizophrenic subjects following lysergic acid diethylamide ingestion, 239

FACE
—diagnosis and treatment of facial pain, 356

FRENQUEL—*See Azacyclonol.*

GENERAL PRACTICE
—characteristic personality patterns seen in, 244
—interesting experiences in teaching psychiatry to general practitioners, 154

GENETICS
—familial occurrence of multiple sclerosis, 260

—recessive transmission of mental deficiency to all children by parents similarly affected, 244
—role of, in psychiatry, 343
GERIATRICS—*See Old Age.*
GLIOMA
—classification of gliomata on basis of pathogenesis, 266
GLUTAMIC OXALACETIC TRANSAMINASE
—in serum and cerebrospinal fluid of patients with cerebrovascular accidents, demonstration of blood-cerebrospinal-fluid barrier, 163
L-GLUTAVITE
—one year study of, on group of elderly, long term hospitalized, schizophrenic patients, 7*
GRASPING
—grasping deficit in infantile spastic hemiparesis, 355
GROUP PSYCHOTHERAPY
—influence of music upon verbal participation in group psychotherapy, 253

HALLUCINATIONS
—auditory hallucinations in chronic alcoholism, 335
—of poliomyelitis patients during treatment in respirator, 363
—studies with ceruloplasmin and a new hallucinogen, 350
HEAD INJURIES
—role of respiratory insufficiency in mortality of severe head injuries, 362
HEARING
—clinical significance of impairment of sound localization, 255
HEART
—loss of consciousness and convulsions with congenital heart disease, 356
—weights of brain, heart, spleen, and kidneys in elderly, mentally ill patients, relation of organ weights to sex, age, nutrition, and cause of death, 342
HEMATOMA
—subdural, among infants and children, 167
HEMIPARESIS
—responses to digital carotid artery compression in hemiplegic or hemiparetic patients, 159
HEMIPLEGIA
—nature of edema in paralyzed limbs of hemiplegic patients, 256
—responses to digital carotid artery compression in hemiplegic or hemiparetic patients, 159
HEMORRHAGE
subarachnoid:
—among infants and children, 167
—with papilledema due to spinal neurofibroma, 261
HISTAMINE
—personality reaction to, 202*
HOMICIDE
—analysis of homicide-suicide, 208*
HOMOSEXUALITY
—psychometric aspects of, 65
HORMONES
—blood levels of adrenal cortex and thyroid hormones in patients suffering from depressive reactions, 155
HOSPITALS
—neurology in the general hospital, 255
—psychiatry in the general hospital today, 245
psychiatric:
—admissions of geriatric cases to, 242
—culture of interpersonal relations in therapeutic institution for emotionally disturbed children, 154
—effects of physiodynamic treatments in a hospital over a 10 year period, 67
—future of the public mental health hospital, 237
—longitudinal study of electroencephalographic frequency patterns in mental hospital patients and normal controls, 78
—one year study of L-glutavite on long term hospitalized, elderly, schizophrenic patients, 7*
HUNTINGTON'S CHOREA
—clinical and psychometric study of effects of procaine amide in, 359
HYDATID CYST
—of brain, treatment of, 165
HYGROMA
—subdural, among infants and children, 167
HYPNOSIS
—concept of, 340
HYPOTHERMIA
—and cerebral vascular lesions, experimental middle cerebral artery interruption followed by induction of hypothermia, 162
HYSTERIA
—hysterical personality and "hysterical" conversion, 249

INFANTILE SPASTIC HEMIPARESIS
—grasping deficit in, 355
INFANTS
—detection of schizophrenia in, 153
—multilocular cystic encephalopathy of, 364
—neurologic abnormalities in infants and diabetic mothers, 354
—subdural hematoma, subdural hygroma, and subarachnoid hemorrhage in, 167
INFECTIONS
—cerebral, bilateral loss of vision from, 264
—*Endamoeba histolytica*, in patients on psychiatric research ward, treatment with chlorbetamide, 44*
INFECTIOUS POLYNEURITIS
—collagen disease of the nervous system, and, 264

INHIBITION
—of conditioned response following arecoline administration, 226*
INJURIES
—compensation factor in low back, 340
INSOMNIA
—methapyrilene and scopolamine in combination for, 150
INSULIN COMA THERAPY
—comparative study of chlorpromazine and insulin coma in therapy of psychosis, 348
—methocholine reaction indices as prognosticators for insulin coma therapy, 303*
—protracted coma in insulin shock therapy, its management, 102*
INTERNS
—teaching psychiatry to, 345
IPRONIAZID
—adjunctive use of, in psychotherapy, 351
IRRATIONALITY
—intrafamilial environment of schizophrenic patient and transmission of, 347

JAUNDICE
—chlorpromazine, continued chlorpromazine ingestion in presence of, 352

KEMADRIN—*See Procyclidine Hydrochloride.*
KIDNEYS
—weights of brain, heart, spleen, and kidneys in elderly, mentally ill patients, relation of organ weights to sex, age, nutrition, and cause of death, 342

LAUGHTER
—electroencephalographic correlation of laughing fits, 360
LIGHTNING STROKE
—neuropsychiatric sequelae of, 159
LIVER
—weights of brain, heart, spleen, and kidneys in elderly, mentally ill patients, relation of organ weights to sex, age, nutrition, and cause of death, 342
LOBOTOMY
—neuropathological study of prefrontal lobotomy, 81
LOCOMOTION
—facilitating locomotion in neurological disease of lower extremities, description of new appliance, 267
LYSERGIC ACID DIETHYLAMIDE (LSD-25)
—psychopharmacological studies of intoxication with, effects of premedication with BOL-128 (2-bromo-*d*-lysergic acid diethylamide), mescaline, atropine, amobarbital, and chlorpromazine, 157
—pupil dilation in normal and schizophrenic subjects following ingestion of, 239
—therapy with, 19*

MANIC-DEPRESSIVE PSYCHOSES
—physiologic base of manic-depressive illness, 149
MANTOMIDE—*See Chlorbetamide.*
MEDICO-LEGAL PROBLEMS
—physician and testamentary capacity, 59
—psychiatry's contributions to criminal law and procedure, 335
MEMORY
—recent impairment in unilateral temporal lesions, 160
MENINGITIS
—development of tuberculous meningitis during pregnancy, 362
—tuberculous, 166
MENTAL DEFICIENCY
—classification of, on an etiological-pathological basis, 62
—comparative study on Thorazine and Serpasil in mental defectives, 73
—differentiations between mental defective with psychosis and childhood schizophrenic functioning as mental defective, 153
—occurrence of neurologic abnormalities in infants and diabetic mothers, 354
—psychiatric problems related to mental retardation, 343
—recessive transmission of, to all children by parents similarly affected, 244
MENTAL ILLNESS
—care and treatment of elderly chronically ill neuropsychiatric patient in the Veterans Administration, 342
—culture of interpersonal relations in therapeutic institution for emotionally disturbed children, 154
—differential diagnosis of organic dementias and affective disorders in aged patients, 151
—influence of antibiotics on aged mental patients, 243
—problem of aged persons suffering from mental disorders, 243
—social rehabilitation for mental patients, 247
—unrecognized intracranial lesions in mentally sick patients over 60, 81
MENTAL TESTS
—for pathophysiologic identification and classification of psychoses, 1*
—psychic alterations in disseminated sclerosis, general, statistical, and Rorschach-test study on 200 patients, 77
—psychometric aspects of homosexuality, 65
MEPAZINE
—combined chlorpromazine-mepazine therapy, 32*

MEPROBAMATE
—chemotherapy of depression, use of meprobamate combined with benactyzine (2-diethylaminoethyl benzilate) hydrochloride, 351
—controlled study of, in mental hygiene clinic, 323*
—possible habituating properties of, 350
—for tension states, 67
—treatment of neuropsychiatric patients with, 69

MERATRAN—*See Pipradrol.*

MESCALINE
—intoxication effects of premedication with, and psychopharmacological effects of lysergic acid diethylamide, 157

METHACHOLINE
—methacholine reaction indices as prognosticators for insulin coma therapy, 303*
—reliability of methacholine (Mecholyl) test, 338

N-METHYL-α,α-METHYLPHENYLSUCCINIMIDE (CELOTIN)
—in patients with refractory epilepsy, 259

METHYLPHENIDATE
—use of methylphenidate (Ritalin) hydrochloride in alcoholism, 239

METHAPYRILENE
—scopolamine plus, for insomnia, 150

MIGRAINE
—hemiplegic, 354

MONILIASIS
—generalized, with localization in brain, 363

MORTALITY RATES
—comparison of monoureide and diureide sedatives with respect to, 149
—dilirium tremens, reduction of mortality and morbidity with promazine, 238

MULTIPLE SCLEROSIS
—familial occurrence of, 260
—prognosis and treatment of, 359
—psychiatric aspects of, 259

MUSCLE RELAXANTS
—abnormal responses to, in carcinomatous neuropathy, 355

MUSIC
—influence of, verbal participation in group psychotherapy, 253

MYASTHENIA GRAVIS
—after removal of thymoma, 161
—evaluation of thymectomy in, 353
—multiple-dose tablets of neostigmine bromide and Mestinon bromide for, 168

MYOPATHY
—abnormal responses to muscle relaxants in carcinomatous neuropathy, 355

MYOTONIA
—treatment of, with procainamide, 169

NEOSTIGMINE BROMIDE
—in treatment of myasthenia gravis, 168

NERVOUS SYSTEM—*See also Central Nervous System.*
—theory of nerve deafness, 357
diseases:
—collagen disease, with particular reference to the syndrome of infectious polyneuritis, 264
—diagnosis of cerebral schistosomiasis, 263

NEURALGIA
—bilateral trigeminal neuralgia, 354

NEUROLOGY
—clinical aspect of cerebral anoxia, 75
—at the crossroads, 254
—in the general hospital, 255
—neurologic manifestations of thrombotic thrombocytopenic purpura, 256
—occurrence of neurologic abnormalities in infants and diabetic mothers, 354
—pediatric contributions to, 160
—unrecognized intracranial lesions in mentally sick patients over 60, 81

NEUROPATHY
—abnormal responses to muscle relaxants in carcinomatous neuropathy, 355

NEUROSURGERY
—care of severely injured patient, neurosurgical injuries, 165

NUMBNESS
—ischemic and postischemic numbness and paresthesia, 360

OBESITY
—dynamics in a case of obesity, 292*

OLD AGE
—admissions of geriatric cases to mental hospital, 242
—care and treatment of elderly chronically ill neuropsychiatric patient in the Veterans Administration, 342
—chlorpromazine as adjunctive therapy in senile agitation, 134*
—differential diagnosis of organic dementias and affective disorders in, 151
—influence of antibiotics on aged mental patients, 243
—L-glutavite for long term hospitalized, elderly, schizophrenic patients, 7*
—perphenazine (Trilafon) for anxiety and agitation in aged patients, 242
—problem of aged persons suffering from mental disorders, 243
—psychodynamics of aging, 62
—treatment of anxiety with proclorperazine in geriatric patients, 156
—unrecognized intracranial lesions in mentally sick patients over 60, 81
—weights of brain, heart, spleen, and kidneys in elderly, mentally ill patients, relation of organ weights to sex, age, nutrition, and cause of death, 342

PACATAL—*See Mepazine.*

PAIN
—diagnosis and treatment of facial, 356

—termination of central pain pathway in man, 266
PALSY
—bilateral ulnar-nerve palsy, 164
PAPILLEDEMA
—subarachnoid hemorrhage with papilledema due to spinal neurofibroma, 261
PARANOIA
—adrenocortical response and phosphate excretion in, 150
—treatment of chronic paranoid schizophrenic patient, 249
PARENTS
—criteria distinguishing parents of schizophrenic and normal children, 338
—occurrence of neurologic abnormalities in infants and diabetic mothers, 354
—psychiatrists' conceptions of the schizophrenogenic parent, 339
—recessive transmission of mental deficiency to all children by parents similarly affected, 244
PARESIS
—psychosis of general paresis, 156
PARESTHESIA
—ischemic and postischemic numbness and, 360
PARKINSON'S DISEASE
—procyclidine hydrochloride and, 82
—teamwork in treatment of, 261
PERIPHERAL NERVES
—bilateral ulnar-nerve palsy, 164
—ischemic and postischemic numbness and parasthesiae, 360
PERPHENAZINE
—to control anxiety and agitation in aged patients, 242
PERSONALITY
—characteristic patterns seen in general practice, 244
—and creativity in artists and writers, 341
—hysteria, the hysterical personality, and "hysterical" conversion, 249
—reactions of, to adrenalin and histamine, 202*
PHENOBARBITAL
—Raunormine versus reserpine and phenobarbital in chronic schizophrenia, 349
PHENOTHIAZINE DERIVATIVES
—convulsant action of, 168
PHOSPHATE
—excretion in schizophrenia, 150
PHYSICIANS
—testamentary capacity and, 59
interns:
—teaching psychiatry to, 345
student:
—freshman research seminar, an experiment in elective psychiatry, 345
—relation of student anxiety to concepts of role in medical care, 344
PHYSIOLOGY
—adrenocortical response and phosphate excretion in schizophrenia, comparison of catatonic and paranoid schizophrenic men and normal men, 150
—carbon dioxide therapy, physiologic principles and clinical implications, 91*
—physiologic base of manic-depressive illness, 149
—reactivity of brain tissue to intracranial and external electrotherapy, 162
—tests for pathophysiologic identification and classification of psychoses, 1*
PIPRADROL
—clinical evaluation of Meratran and Frenquel on chronic psychotic population, 69
PLACEBOS
—drug placebo, its psychodynamic and conditional reflex action, 61
PM 1090 (ALPHA,ALPHA,BETA,BETA-TETRAMETHYLSUCCINIMIDE
—clinical investigation of a convulsant drug, 38*
POLIOMYELITIS
—hallucinations of poliomyelitis patients during treatment in respirator, 363
PREGNANCY
—development of tuberculous meningitis during, 362
PROCAINE AMIDE
—clinical and psychometric study of effects of, in Huntington's chorea, 359
—treatment of myotonia with, 169
PROCLORPERAZINE
—treatment of anxiety with, in geriatric patients, 156
PROCYCLIDINE HYDROCHLORIDE
—in treatment of Parkinsonism, 82
—convulsant action of phenothiazine derivatives, 168
PROMAZINE
—critical study of, 219*
—dilirium tremens, reduction of mortality and morbidity with, 238
—effects of, in mental syndromes, 73
—for hospitalized chronic psychotic patients, 319*
PSYCHIATRY
—analysis of homicide-suicide, 208*
—basic concepts for restoration of psychiatric patient to community and employment, 64
—compensation factor in low back injuries, 340
—dementia praecox and schizophrenia, 240
—drug placebo, its psychodynamic and conditional reflex action, 61
—endocrine concomitants of physical psychiatric treatments, 71
—etiologies of the schizophrenic syndrome, 248
—experimental catatonia and psychopharmacology of neuroleptics, 277*
—freshman research seminar, an experiment in elective psychiatry, 345
—Freudian dream interpretation 2000 years before Freud, historical and other aspects of dream interpretation, 155
—in general hospital today, 245

—general theory of treatment in psychiatry, 151
—interesting experiences in teaching psychiatry to general practitioners, 154
—legal aspects of, 59
—milieu and activity therapy with chronically disturbed female patients, 347
—neuropsychiatric sequelae of lightning stroke, 159
—personality reaction to adrenalin and histamine, 202*
—preventive psychiatry, 336
—psychiatric aspects of multiple sclerosis, 259
—psychiatric problems related to mental retardation, 343
—psychiatry's contributions to criminal law and procedure, 335
—psychic alterations in disseminated sclerosis, general, statistical, and Rorschach-test study on 200 patients, 77
—response of postpartum psychiatric symptoms to L-triiodothyronine, 170
—role of genetics in, 343
—somatic therapy in, 181*
—teaching psychiatry to interns, 345
—treated sex offender, 238
—two-year comparative study of ataraxics in neuropsychiatric patients, 69

PSYCHOANALYSIS
—concepts of Bleuler, approach to phenomenologic analyses, 242
—impact of, upon child psychology, 346
—psychoanalytic approach to schizophrenic anxiety, 346
—transient psychotic episodes during psychoanalysis, 65

PSYCHOSIS
—borderline psychotic patient, importance of diagnosis in medical and surgical practice, 63
—clinical evaluation of Meratran and Frenquel on chronic psychotic population, 69
—comparative study of chlorpromazine and insulin coma in therapy of psychosis, 348
—differentiations between mental defective with psychosis and childhood schizophrenic functioning as mental defective, 153
—follow-up study of 255 patients with acute schizophrenia and shizophreniform psychoses, 246
—postoperative, 337
—promazine for hospitalized chronic psychotic patients, 319*
—psychosis of general paresis, 156
—sustained-release chlorpromazine in management of hospitalized chronic psychotic patients, 348
—tests for pathophysiologic identification and classification of, 1*
—transient psychotic episodes during psychoanalysis, 65

PSYCHOSOMATIC MEDICINE
—psychosomatic approach to medicine, 63

PSYCHOTHERAPY
—adjunctive use of iproniazid in, 351
—analysis of methods for teaching, 254
—bias in psychotherapists of different orientations, 240
—dynamics in a case of obesity, 292*
—essence of mental cure, manifold principles active in psychotherapy, 253
—evolution versus "revolution" in psychotherapy, a biodynamic integration, 60
—influence of music upon verbal participation in group psychotherapy, 253
—principles in psychotherapy of patients following hospitalization for schizophrenia, 352

PUPIL DILATION
—in normal and schizophrenic subjects following lysergic acid diethylamide ingestion, 239

PYRIDOSTIGMIN BROMIDE
—treatment of myasthenia gravis, prolonged action with multiple-dose tablets of neostigmine bromide and Mestinon bromide, 168

RAUWOLFIA—See Reserpine.

REHABILITATION
—of aphasic patient, 169
—basic concepts for restoration of psychiatric patient to community and employment, 64
—social rehabilitation for mental patients, 247

RESERPINE
—in anxiety states, 71, 252
—comparative study of Thorazine and Serpasil in mental defectives, 73
—effects of, on psychodynamic and social processes, 252
—for mentally ill epileptics, 68
—Raunormine versus reserpine and phenobarbital in chronic schizophrenia, 349
—rauwiloid therapy in alcoholism, 74
—treatment of neuropsychiatric patients with, 69
—in treatment of schizophrenia, 72

RESPIRATION
—hallucinations of poliomyelitis patients during treatment in respirator, 363
—role of respiratory insufficiency in mortality of severe head injuries, 362

ROENTGEN RAYS
—process of demyelination in the central nervous system, mechanism of demyelination and necrosis of the cerebral centrum incident to x-radiation, 267

RORSCHACH TEST
—study of psychic alterations in disseminated sclerosis, 77

SAKEL, MANFRED J.
—in memoriam, 54

SCHISTOSOMIASIS
—diagnosis of cerebral, 263
SCHIZOPHRENIA
—adrenocortical response and phosphate excretion in, 150
—classification of, views of Kleist and his co-workers, 61
—dementia praecox and, 240
—etiologies of schizophrenic syndrome, 248
—extrapyramidal system and, 156
—follow-up study of schizophrenia and schizophreniform psychoses, 246
—multidisciplinary research in, 341
—pupil dilation in normal and schizophrenic subjects following lysergic acid diethylamide ingestion, 239
—task orientation and, structured ward setting, 152
clinical studies:
—biometric evaluation of somatotherapies, 66
—of chronic schizophrenia, 337
—L-glutavite for long-term hospitalized, elderly, schizophrenic patients,7*
—Raunormine versus reserpine and phenobarbital in chronic schizophrenia, 349
diagnosis:
—criterion for chronicity in schizophrenia, 241
—detection of schizophrenia in infancy, 153
—differentiations between mental defective with psychosis and childhood schizophrenic functioning as mental defective, 153
—of schizophrenia and the schizophrenic, 241
family and:
—criteria distinguishing parents of schizophrenic and normal children, 338
—intrafamilial environment of schizophrenic patient, transmission of irrationality, 347
—psychiatrists' concept of parents of children with, 339
treatment:
—chlorpromazine in, 251
—of chronic paranoid schizophrenic patient, 249
—impact of somatic therapies on course and clinical profile of schizophrenias, 195*
—PM 1090, investigation of a convulsant drug, 38*
—principles in psychotherapy of patients following hospitalization for schizophrenia, 352
—psychoanalytic approach to schizophrenic anxiety, 346
—reserpine in, 72
SCHOOL
—organic and organizational aspects of school adjustment problems, 247
SCLEROSIS
—psychic alterations in disseminated sclerosis, 77
—tuberous sclerosis complex, 358
SCOPOLAMINE
—methapyrilene plus, for insomnia, 150
SEIZURES
—syncope and, 259
SEROTONIN
—5-hydroxytryptamine (serotonin) content in human brain, 357
SERPASIL—*See Reserpine.*
SEXUAL OFFENDERS
—treated, 238
—treatment of, in California, 339
SIDE EFFECTS
—comparison of monoureide and diureide sedatives with respect to, 149
SOCIAL PROCESSES
—effects of reserpine on psychodynamic and social processes, 252
SOCIAL WORK
—social rehabilitation for mental patients, 247
SOUND LOCALIZATION
—clinical significance of impairment of, 255
SPINAL CORD
—subarachnoid hemorrhage with papilledema due to spinal neurofibroma, 261
SPLEEN
—weights of brain, heart, spleen, and kidneys in elderly, mentally ill patients, relation of organ weights to sex, age, nutrition, and cause of death, 342
SUICIDE
—analysis of homicide-suicide, 208*
SURGERY
—borderline psychotic patient, importance of diagnosis in medical and surgical practice, 63
—postoperative psychoses, 337
SYMPATHY
—empathy and, 341
SYNCOPE
—seizures and, 259

TASK ORIENTATION
—schizophrenia and, 152
TEACHING
—analysis of methods for teaching psychotherapy, 254
—interesting experiences in teaching psychiatry to general practitioners, 154
TENSION
—meprobamate for tension states, 67
TESTS
—reliability of methacholine (Mecholyl) test, 338
mental—See Mental Tests.
THORAZINE—*See Chlorpromazine.*
THROMBOTIC THROMBOCYTOPENIC PURPURA
—neurologic manifestations of, 256
THYMECTOMY
—evaluation of, in myasthenia gravis, 353
THYMOMA
—myasthenia gravis after removal of, 161
THYROID GLANDS
—blood levels of adrenal cortex and thyroid

hormones in patients suffering from depressive reactions, 155
THYROXIN
—prevention of ECC syndrome by, 97*
TRANQUILIZERS—*See Ataraxics.*
TRICHOTILLOMANIA
—of long-standing duration, response to chlorpromazine, 141*
TRIGEMINAL NERVES
—bilateral trigeminal neuralgia, 354
L-TRIIODOTHYRONINE (CYTOMEL)
—response of postpartum psychiatric symptoms to, 170
TRILAFON—*See Perphenazine.*
TUBERCULOSIS
— tuberculous meningitis, 166
TUMORS
—difficulties in diagnosis of caudal, 364
intracranial:
—encephalography and ventriculography compared for investigation of, 361
—prognosis and classification of primary, 80

ULNAR NERVE
—bilateral ulnar-nerve palsy, 164

VENTRICULOGRAPHY
—and encephalography, compared for investigation of intracranial tumors, 361
VISION
—bilateral loss of, from cerebral infection, 264
—cerebral blindess, 165

WILLS
—physician and testamentary capacity, 59
WOLTMAN'S SIGN
—diagnostic importance of the myxedema reflex (Woltman's sign), 354
